

OMAR MOUSSA BIN ZAKARIA

SUMMARY

A 3rd Year Bachelor of Computer Science (Hons.) Netcentric Computing student. Detail-oriented student with a proven ability to execute tasks requiring data precision and consistently deliver high-quality work ahead of deadlines. I am passionate about learning cutting-edge tech, especially the topic of emerging AI and turning curiosity into actionable skills. Based on past projects, I'm known as a key player who loves collaborating, solving problems, and delivering quality work on time. Most importantly, I am always open and committed to seeking mentorship and knowledge sharing opportunities with industry experts.

PROFESSIONAL CERTIFICATE AND AWARDS

• Introduction to Artificial Intelligence, IBM	Feb 2025
• Introduction to IoT, Cisco	Jun 2024
• Google Cloud Computing Foundations: Cloud Computing Fundamentals	Feb 2024
• Google Cloud Computing Foundations: Data, ML and AI in Google Cloud	Feb 2024
• Google Cloud Computing Foundations: Infrastructure in Google Cloud	Feb 2024
• Google Cloud Computing Foundations: Networking & Security in Google Cloud	Feb 2024
• AWS Cloud Practitioner Essentials	Feb 2024
• 5th Semester Dean List Award	May 2025
	Mac 2025

EDUCATION

Bachelor of Computer Sciences (Hons.) Netcentric Computing	2022 - Current
• University Technology of MARA Shah Alam Current CGPA:3.45 Dean Award : 5th, 6th Semester	
Matriculation Foundations	2021 - 2022
• Banting,SelangorMatriculation CGPA:3.54	
• Malaysian University English Test (MUET) Band: 4.0	
Sijil Pelajaran Malaysia (SPM)	2016-2020

PROJECT EXPERIENCES

Real-Time SportsTeam-UpCrowdsourcing Based Web Application for UiTM Shah Alam Students with User Recommendation System using K-Nearest Neighbor Algorithm and Machine Learning Powered Content Moderation System	2024 - Current
• Developed using React.js (JavaScript), Vite, Node.js, Supabase (PostgreSQL)	
• Display Real-time sports vacancies and allow players to host matches based on their preferences, and other players can join a corresponding team.	
• Utilises Vector embedding using pgvector and KNN algorithm for player similarity calculation and sorting algorithm.	
Web Application Permit Machine Learning Web Scraper and Developer for Southern California City websites and dynamic map-based interface with drive-time and distance calculations between sites.	2025
• An automated system that scrapes grading permits from 35-40 Southern California city websites, normalizes data, and visualizes permits on an interactive map with drive-time calculations.	
Solving to mitigate Disappearances of Children with Location Tracking using Advanced IoT Sensors (IoT)	2023
• Designed a wearable IoT device to safeguard children by combining real-time GPS tracking and environmental monitoring.	
• Equipped with a panic button and temperature sensor, enables children to trigger an SOS alert (via GSM module), instantly transmitting their GPS coordinates to parents via SMS. An integrated buzzer emits a loud beep to aid physical location, temperature sensor monitors ambient conditions. Parents access real-time location and health data through a web dashboard built in Blynk. Built using Arduino/ESP32 microcontrollers, GPS/GSM modules, and IoT cloud infrastructure.	
Damn Vulnerable Web Application (DVWA) Security Analysis using Kali Linux and Burp Suite	2022
• Setting upDVWain acontrolledenvironment and analyzingvarious vulnerabilities, particularly focusing on Cross-SiteRequest Forgery (CSRF) attacks. Used tools like Burp Suite and Kali Linux to simulate real-world attack scenarios and demonstrated how CSRF vulnerabilities can be exploited to perform unauthorized actions on behalf of authenticated users. The project also covered methods of preventing CSRF using anti-CSRF tokens, SameSite cookies, and Referrer header validation	
Monitoring Network Intrusion Detection and Prevention System (IDPS) using Snort in Kali Linux and Ubuntu	2022
• Configuredand deployed a network intrusion detection systemusing Snortto capturedetected foreign IPaddressinto the network. Developed custom rule sets to detect various attack vectors including port scanning and DDoS attempts. Configured real-time alerting system with syslog integration to provide immediate notification of suspicious network activities. Implemented automated logging and analysis for forensic investigation of security incidents. Successfully detected and prevented multiple unauthorized access attempts during penetration testing scenarios.	

Mental Health IoT Integrated Mobile App Sensor to track User's Heartbeat and SpO2 level	2025
- Constructed a full stack mobile app using React Native (TypeScript, JavaScript, Kotlin), Node.js, Expo) and Supabase (PostgreSQL). - Track user's heartbeat rate and SpO2 level into database from IoT to display into Mobile application. - Developed Ai Chat-app using Gemini 1.5 Model API with customization to track concerning key-words.	
Plastik Hitam: Full-Stack Food Online Delivery Web Application System	2022
Designed and constructed a web application using HTML, CSS and JavaScript from scratch, consisting of working functionality and databases, such as using PHP to connect to Mysql.	
Web Engineering: Constructing a Web Application for Seamless Documentation Procedure of UiTM Paperwork's Protocols requested by the Stakeholder.	2022
Designed and constructed the documentation of Use-Case, Flow of projects and the User-Interface of web applications to solve stakeholders' problems.	
Constructing and Developing end-to-end Network Topology using Cisco	2022
Connecting working nodes end-to-end through the internet using switch and router as well as configuring technical aspects such as IP addresses (IPv4 and IPv6).	
Cinema Booking System Software Application constructed in Java using Netbeans	2022
Constructed a working software application about cinema booking system using Java.	

LEADERSHIP AND PARTICIPATION

- Treasurer and Multimedia Producer of NetCom (Netcentric Computing Club).
- Person in-charge and Director of Maybank Connect Program 2024.
- Multimedia, Content Creating Producer and Cameraman of iHack x Siber Siaga 2024 KLCC event.
- Distributor of Netcom's jacket corporate brand, managing vendor partnerships, inventory logistics, and marketing strategies.
- Live Broadcaster and Multimedia Producer of Valorant Vortex 2024 (UiTM Valorant E-Sport event).
- Part of Club's Director in Hari Keusahawanan KPPIM (UiTM Student's Business Booth Events).
- Football Coach for Score with Spurs 2024 Volunteering Program.
- FA Cup 2024 Selangor vs JDT Usher Volunteer.
- Cybersecurity Awareness: Internet Ethics for Service Learning Malaysia University 2025 (SULAM) Explorace volunteer, technical, jersey and multimedia Distributer

WORKING EXPERIENCES

Data Annotation Tech (Part-time)	
- Artificial Intelligences Trainer through Data Annotation and System Prompt Engineering. - Coding and Programming using Java and Python. - Malay System Prompt and Prompt Reviewer and Evaluator for general and coding context.	
RWS Intellectual Property translation, filing and search services	
Artificial Intelligences Trainer through Data Annotation and System Prompt Engineering in Malay Context.	
Video Editing (Freelance)	
Freelancing for Video Editing using Adobe Premier Pro, Adobe After Effects and Sony Vegas Pro in Upwork and Local Services.	
Kitchen, Banquet, Housekeeping and Steward Staff (Part-time)	
Worked Part-time in Moxy Putrajaya, Double Tree Shah Alam Hotels and IF ONLY Restaurants	

ADDITIONAL INFORMATION

- Languages:** English, Malay
- Soft Skills:** Detail-oriented, Leadership, Hardworking, Team player, and Precise with promises and deadline.
- Others:** C++, Java, JavaScript, TypeScript, C, Dart, MySQL, PHP, Python, Laravel, Flutter, React Native, Adobe After Effects, Adobe Premier Pro, Canva, Sony Vegas Pro, Capcut Pro, HTML, CSS, Cisco, Zapier, N8N, Make
